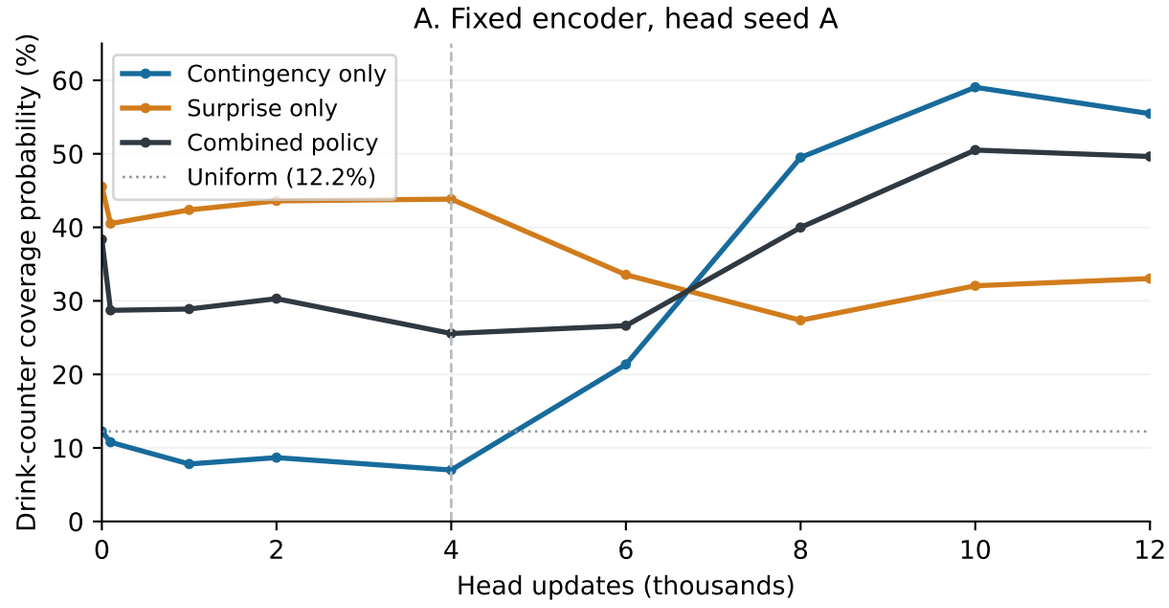
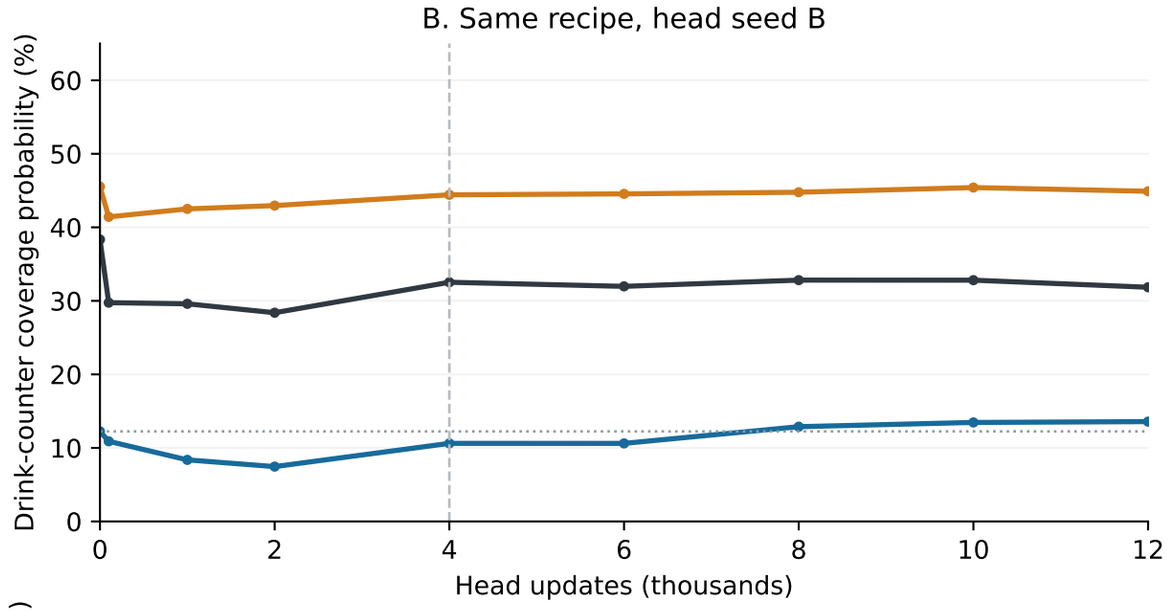
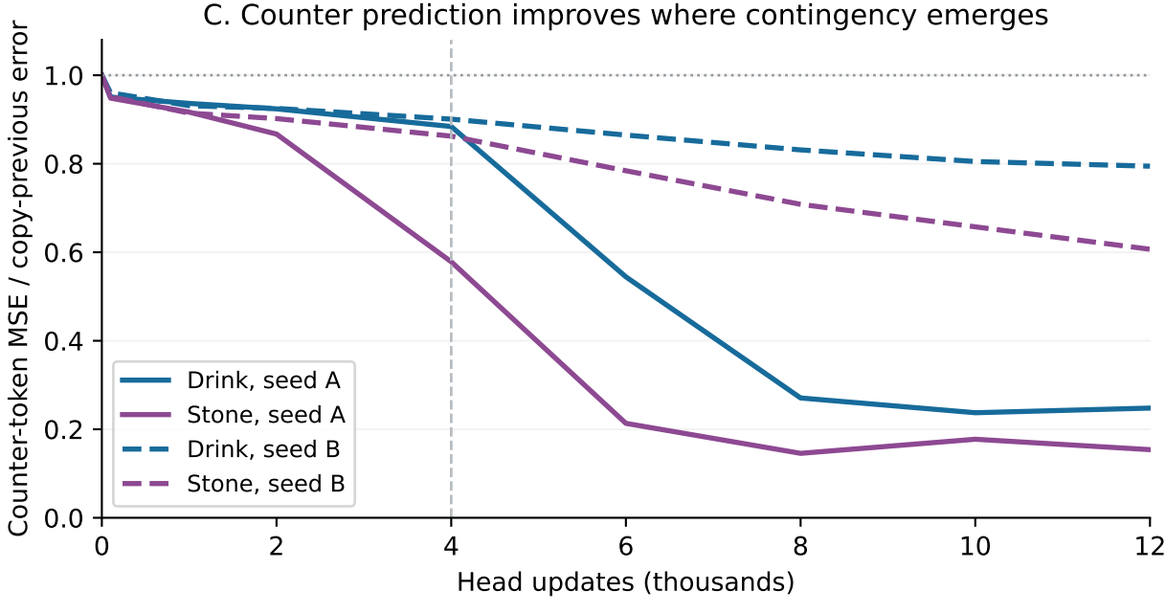
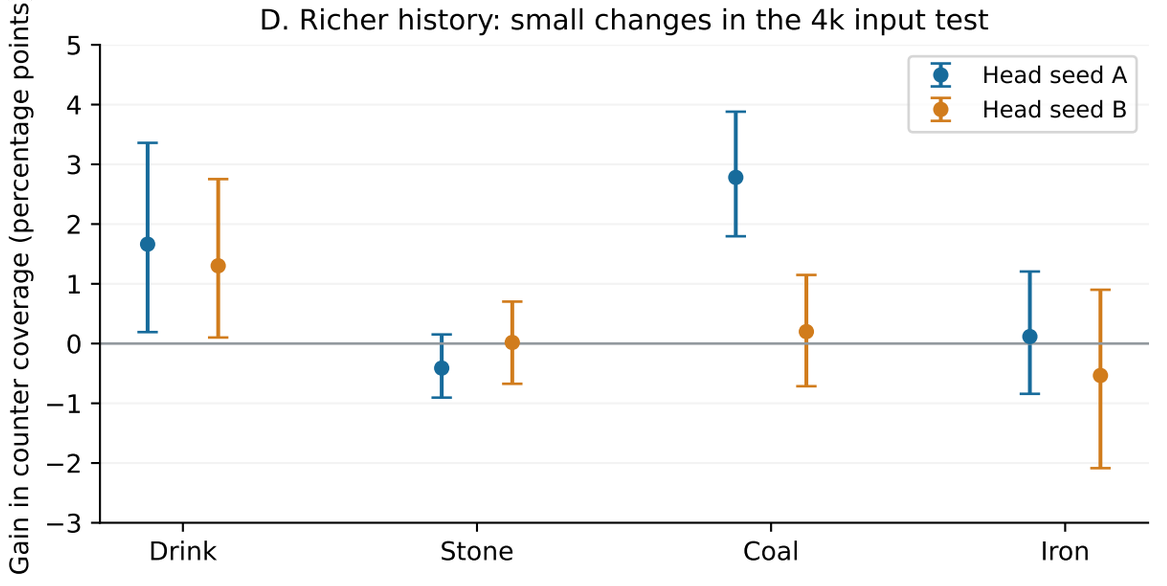
Cheap fixation: a learnable handover, with unstable acquisition









A–C: exact replays of E2 fresh 12k fits, fixed P1-F1.5 checkpoint10. Dashed vertical line = 4k within this schedule;
E1 used a different 4k decay schedule. D: paired episode-bootstrap 95% intervals, conditional on each fitted head.
Fresh cohort; 128 drink/stone/coal contexts, 82 iron. Coverage is not prediction accuracy or measured world-learning benefit.
